

Daniel Halter

Passionate about sustainably reducing risks for organisations undergoing change with a specific focus to effective and efficient risk prevention and -mitigation. Creating true opportunities for the business.

How I work

As a risk professional, it fascinates me to identify challenges. By using various kinds of data and information understand where to focus to mitigate risk and create true opportunities for the business, consistent with the company's vision.

We found (cost-) effective, sustainable and innovative solutions. Thanks to the consequent risk approach we were able to react fast, broaden the scope of business we can offer to customers and make the most out of limited resources.

Skills and strengths

- Widely experienced in working in an international and multicultural environment (worked for projects on 5 continents and was based in CH, Abu Dhabi and Marseille.)
- Motivated leader of diverse global teams in matrix organisation
- Flexible, dedicated & hard working
- Visionary and creative forward-thinker
- Quality minded
- Accomplished presenter of stakeholder-specific information up to board level

Expertise and success stories

Conceptual and optimization in areas of risk management

Designed and implemented Risk Management frameworks (ERM, M&A, ESG) & run risk workshops on all levels.

I rolled out group wide Sustainability/ESG programs as effective risk mitigation and opportunities-creating solution and introduced an umbrella Quality Assurance

Risk Transfer / Insurance

Evaluate and introduce innovative risk financing concepts in partnership with insurers and brokers. Using Risk Financing solutions to pro-actively reduce risks in operation.

HR and people Risk Management

We developed a holistic HR Risk Management with close-co work between departments (i.e., HSEQ and C&B) to reduce accident and absenteeism and improve work conditions (ESG initiatives.)

Innovative and customer focused

A consequent risk approach to allows also to find solutions the business or customers are looking for and be a step ahead. Examples included new methods and techniques in HSE; Network Management, BCP, Disaster recovery for 4PL customers or risk financing solutions to reduce collateral.
